

Product Care

All our products are manufactured and finished to a very high standard. To maintain this the following simple steps should be followed.

Use of Lubricants is fine, either oil or water based, we recommend cleaning the toy shortly after use to protect the finish.

Clean the toys after use with mild soapy water or sex toy cleaner. Then dry immediately.

Toys should be stored separately from other toys made from artificial materials to prevent staining or marking occurring to either product.

Although made from hard woods and being by nature robust, you should avoid dropping or striking the item against hard surfaces.

If the surface of the toy becomes damaged significantly we recommend stopping using it to prevent injury.

The finish can be protected and enhanced using food safe waxes. Chopping board oils can also be effective and are by definition, food safe.

Guarantee

Our products are from high quality hard woods and carefully selected to be defect free. We guarantee all products against natural defects and will provide free replacement on return of the product.
